

WHAT IS CLAIMED IS:

1 1. An optical fiber connection module comprising:
2 a connection tube;
3 a sleeve made by electrocast being securely received in the connection tube; and
4 an assembly tube joined with the connection tube at a flange; and
5 an optical fiber module securely received in the assembly tube and being
6 coaxial with the sleeve.

7 2. The optical fiber connection module as claimed in claim 1, wherein material
8 for making the sleeve has high friction resistance and rigidity.
